

Discovery Phase – System Enumeration

The following commands were executed to gather information about the system and user context.

These commands allow an attacker to understand the environment, including user identity, system details, and running processes.

In the SIEM, multiple events were identified within a short time window. This pattern indicates enumeration activity rather than normal user behavior.

The screenshot shows a SIEM query interface. At the top, a KQL query is entered: `1 FROM logs* 2 | WHERE process.name IN ("whoami.exe", "HOSTNAME.EXE", "tasklist.exe", "systeminfo.exe") 3 | KEEP @timestamp, process.command_line, process.hash.sha256, user.name, host.name 4 | SORT @timestamp DESC`. Below the query, it indicates "6ms | 4 documents processed". The results are displayed in a table with 5 columns: @timestamp, process.command_line, process.hash.sha256, user.name, and host.name. There are 4 results shown, all from user 'oola' on host 'asd'.

@timestamp	process.command_line	process.hash.sha256	user.name	host.name
Apr 20, 2026 @ 01:13:14.080	"C:\Windows\system32\systeminfo.exe"	6f87caa51bdea802045bb281f c2686a3c76364c26a3ffe6c2c cac4af5f9db37b	oola	asd
Apr 20, 2026 @ 01:13:04.657	"C:\Windows\system32\tasklist.exe"	be7241a74fe9a9d30e0631e41 533a362b21c8f7aee3e5b6ad3 19cc15c024ec3f	oola	asd
Apr 20, 2026 @ 01:12:55.221	"C:\Windows\system32\HOSTNAME.EXE"	a90c3fb350a11c6f6a6efa960 7987d924d1de65e09ca9faf2e 0e0e00531ee335	oola	asd
Apr 20, 2026 @ 01:12:41.721	"C:\Windows\system32\whoami.exe"	1d4902a04d99e8ccbfe7085e6 3155955fee397449d386453f6 c452ae407b8743	oola	asd

The activity was classified as suspicious due to the sequence and timing of the commands.

The screenshot shows a SIEM alert notification. The main text reads: "The execution of whoami.exe was detected on the host. This command is commonly used for user enumeration and may indicate activity. Additional discovery were also observed on the host, including hostname, systeminfo and tasklist, which may indicate an attempt to gather system information. Further investigation is recommended. Observed discovery commands:". Below this, there is a table with 2 columns: Timestamp and path. The table contains four rows of data, each showing a timestamp and the command executed. On the right side, there is a sidebar with a section titled "External incident system" and a button labeled "Add connect".

Timestamp	path
whoami.exe = "Apr 20, 2026 @ 01:12:41.721"	"C:\Windows\system32\whoami.exe"
hostname.exe = "Apr 20, 2026 @ 01:12:55.221"	"C:\Windows\system32\HOSTNAME.EXE"
tasklist.exe = "Apr 20, 2026 @ 01:13:04.657"	"C:\Windows\system32\tasklist.exe"
Systeminfo.exe = "Apr 20, 2026 @ 01:13:14.080"	"C:\Windows\system32\systeminfo.exe"
