

Discovery Playbook (System Enumeration)

Objective:

Simulate and detect discovery behavior through system enumeration commands.

Attack Commands:

whoami

Hostname

Tasklist

systeminfo

Execution Steps:

1. Open PowerShell
2. Execute the commands
3. Go to SIEM (Discover)
4. Filter last 5 minutes

Observed Events:

whoami.exe

Hostname.exe

tasklist.exe

systeminfo.exe

MITRE ATT&CK Mapping: Tactic:

Discovery (TA0007)

Techniques: T1033, T1057, T1082

Detection Logic:

process.name:

("whoami.exe" OR "hostname.exe" OR "tasklist.exe" OR "systeminfo.exe")

Correlation Rule:

Multiple commands in short time window

Severity:

Low Category

Discovery Tags:

discovery, enumeration, windows

Analysis:

Sequential execution of enumeration commands indicates reconnaissance.

Conclusion:

Suspicious when executed in sequence.
